Berlin, Deutschland

SUMMARY

Software engineering student starting a B.Sc. in Ingenieurinformatik at HTW Berlin with 3 years of professional development experience through an IHK vocational training. Experienced in building full-stack applications using TypeScript, React, Node.js, and cloud technologies, and familiar with the full software development lifecycle including requirements engineering, implementation, testing, and deployment. Passionate about building innovative applications and collaborating in agile teams to deliver real solutions for end users.

EDUCATION

B.Sc. Ingenieurinformatik - HTW Berlin

Expected graduation: 2029

Web & App Development Bootcamp - WBS Coding School

2024 - 2025

Computer Science Expert in Application Development (IHK Vocational Training)

2021 - 2024

EXPERIENCE

01/2025 – Today

Freelance / Remote

Freelance Full-Stack Developer

- Built full-stack web applications using React, Vue.js, Node.js, and MongoDB
- Implemented REST APIs and authentication systems
- Managed deployment and version control using Git
- Participated in the full development lifecycle from requirements analysis to deployment

11/2021 - 08/2024

Vaimedici GmbH

Junior Software Developer (Apprenticeship)

- Developed and maintained enterprise system interfaces using Java, SQL, XML, and XSLT
- Implemented SQL queries to monitor and improve large customer datasets
- Contributed to cloud migration initiatives using Microsoft Azure
- Worked in Agile development teams using Jira and Confluence

SKILLS

- Frontend: Vue.js, React, TypeScript, Tailwind CSS, HTML5, CSS3
- Backend: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL
- Tools & Technologies: Git, Docker, AWS, WebSockets, Vite
- Languages: German (C1), English (C1), Arabic (C2)

PROJECTS

Abdeen Legal (Vue.js, Express, MongoDB) | Repositories: [FE](#)

- Built a modern service platform with a customizable Vue.js interface and an optimized backend using Express and MongoDB, integrating Leaflet maps for interactive location display and service-area visualization, with a focus on clean UI, responsive design, and reducing unnecessary server requests to improve speed and usability across devices.

TheraSync (React, Express, OpenAI, Socket.io) | Repositories: [FE](#), [BE](#)

- Built a full-stack application that analyzes journal entries to generate AI-driven mental health insights
- Designed reusable frontend components and implemented real-time communication using WebSockets
- Improved frontend performance by 35% through optimized state management

LoFi Radio (React, Express, MongoDB) | Repositories: [FE](#), [BE](#)

- Developed a scalable streaming platform with a modern audio player and dynamic playlists.

Blanco (React, Express, MongoDB) | Repositories: [FE](#)

- Built a modern service platform with a customizable React interface and an optimized backend using Express and MongoDB, focused on clean UI, responsive design, and reducing unnecessary server requests, which improved speed and usability across devices.
